

BEAM PRIVACY ECOSYSTEM

BEST-IN-CLASS PRIVACY COIN

MimbleWimble, Lelantus, Dandelion++.
No addresses, no amounts, no details.
Privacy by default for everybody!

GPU-MINABLE

Proof-of-Work L1 blockchain.
BeamHash III mining algorithm
(a modified version of Equihash).

CAPPED SUPPLY

Capped emission of 262,800,000 coins.
Periodic halving every four years.
Launched on Jan 2019. No ICO, no premine.

CHEAP AND FAST

One block per minute.
High-frequency transactions (HFTX).
Protected against frontrun and MEV.

LIGHTWEIGHT

No addresses nor transactions are stored.
Cut-through allows discarding spent UTXOs.
A 6-year full node uses only 7 Gb!

CONFIDENTIAL ASSETS

Native uncensorable assets since 2020!
Privacy tokens, whose transactions are
indistinguishable from regular ones.

CONFIDENTIAL STABLECOIN

Over-collateralized, non-custodial,
decentralized, governance-free.
The Liquity model... but confidential!

SMART CONTRACTS

Turing complete. Privacy-preserving.
In any language compiling to WASM.
Immutable or safely upgradable.

PRIVACY DEFI

A complete 'PriFi' infrastructure.
Bring liquidity, get passive income!

CONFIDENTIAL DEX

Confidential Uniswap-like AMM.
The trades are visible, but not
the wallets carrying them out.

CONFIDENTIAL NFTs

Sharing or selling your NFTs
does not expose your wallet!

ETHEREUM BRIDGE

Bridge your ETH, WBTC, USDT & DAI
and use them as Confidential Assets!

ATOMIC SWAPS

Decentralized marketplace for p2p
cross-chain atomic swaps with Bitcoin,
Ethereum, Litecoin, Doge and more.

ANONYMOUS MESSENGER

Secure, free and private
chat between wallets.

DAO GOVERNANCE

Transitioning from a non-profit
foundation towards a DAO, with
governance token & onchain votes.

TALENTED DEV TEAM

Continuous dedicated development.
Code is open source and audited.

QUANTUM COMPUTER SAFE

Protocol ready for a graceful
transition to a post-quantum model.

EXCEPTIONAL WALLET

Beautiful, powerful and easy to use.
Multi-platform and multi-language.
For desktop, mobile and web.

HARDWARE WALLET

Support for Ledger Nano S (slower)
and Nano S Plus (recommended).

TRUE DECENTRALIZATION

Lightweight nodes with fast sync.
Every wallet runs one... even on mobile.
Be your own bank, run your own node!

IN-WALLET DAPPS

Web3 dApps available on IPFS
and running right inside the wallet!
Private, decentralized, uncensorable.

SECURE COMMUNICATION

Integrated secure bulletin board
system (SBBS) between wallets.

FLEXIBLE PAYMENT OPTIONS

Interactive or one-side payments.
Laser Beam (a Lightning adaptation).
Easy-to-use payment processor.

DECENTRALIZED NAMING

Elegant **yourname.beam** addresses
that don't expose your wallet!

OPT-IN AUDITABILITY

Selective transparency :
Payment proofs for each transaction
or Viewkey for the whole wallet.

EVM SUPPORT

An EVM & Solidity compatibility layer
for smart contracts: Coming Soon™!

OPT-IN COMPLIANCE

A rare blockchain that can comply with
both MiCA (selective transparency) and
GDPR (no private data stored onchain).
