

NEPHRITE

The Unstoppable Private Stablecoin

Decentralized · Non-custodial · Permissionless · Anonymous · Confidential · Censorship-resistant

SMART DESIGN

- > The Liquity LUSD model, deployed on the Beam Privacy blockchain.
- > Purely crypto-backed: lock BEAM, borrow NPH.
- > Brilliant self-balancing market incentives.
- > Fully automated and governance-free.
- > Code audited and built to be immutable.

STABILITY

- > Self-sustained peg by economic incentives.
- > Stability further secured by a liquidity reserve.
- > Resistant to attacks and adversarial speculation.
- > The model withstands crypto turmoil since 2021!

CAPITAL EFFICIENCY

- > The best borrowing protocol in DeFi!
- > 0% interest and only 110% collateralization.
- > Permissive up to 10x leverage.
- > Depositors earn rewards and liquidation gains.
- > Collateral is protected by a Recovery Mode.
- > Can even be used as a passive low-risk position.

1 NPH = 1 USD

PRIVACY & ANONYMITY

- > A blockchain native Confidential Asset.
- > As private as BEAM itself.
- > No amounts, no addresses, no transaction details.
- > NPH and BEAM transactions are indistinguishable.

CENSORSHIP - RESISTANCE

- > Permissionless: Anyone can borrow and use it.
- > No centralized or censorable elements.
- > Devs are anonymous. No admin is needed.
- > Collateral is decentralized and non-custodial.
- > Smart contracts are deployed onchain.
- > Front ends run locally within each Beam wallet.

EASE OF USE

- > Simple design, easy to understand.
- > Clean UI, right within the Beam wallet.
- > Fast transactions, cheap fees.
- > Flexible: Choose your collateral ratio, borrow for as long as you want, and repay or redeem NPH at any time.

DECENTRALIZATION

- > No investors, no team allocation, no custody, no admins, no website.
- > No centralized components.
- > Front ends are available on IPFS.
- > Every Beam wallet runs a blockchain node!
